

INTRODUCING ONE OF OUR TWO **NEWEST**, FASTEST, AND MOST **RELIABLE** LEAK DETECTORS.

Portable, Powerful Leak Detectors

This new Fieldpiece leak detector is highly sensitive, durable, and more reliable than anything else on the market.

The new model features a large LCD that provides information about the leaks with bar graphs and numerical values. The rechargeable batteries enable 18 hours of use per charge. It is designed for the field with rugged blow molded carrying case and water resistant body.

Heated Diode Refrigerant Leak Detector, DR58EU

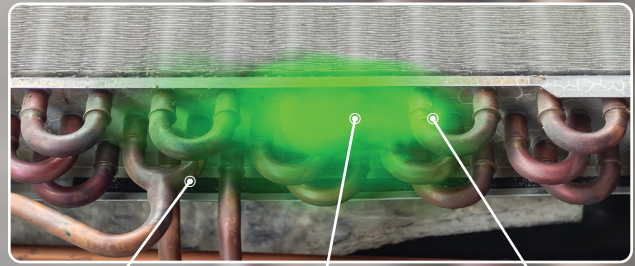

- Great on R410A refrigerant
- Compatible to N2H2 Tracer Gas
- Field replaceable heated diode sensor

Portable, Powerful Leak Detectors

Find Leaks Fast with Easy to Read LCD Screen

All in One, Replaceable Filter Tips

DR58EU

Sensor Type	Heated Diode
Refrigerants	Detects CFC, HFC, HCFC, HFO, Tracer Gas (95% N2 + 5% H2) and blends
Operating environment	Operates at -10°C to 40°C < 75% RH (non-condensing)
Sensor Life	300 hours
Display Type	LCD (backlit for indoor use)
Detection Feedback	Numerical leak size indicator, bar graph, audio speaker and lighted tip
Water Resistance	Certified IP54
Body Type	Compact, rugged overmolded
Battery Type	USB-C Rechargeable Lithium-ion
Battery Life	18 hours
Included	Rugged case, 5 replacement filter tips RFT6
